

This is a plea to your committee to cut spending and implement Bill 128, the State Constitutional Spending Gap. Our state has over spent for too many years. With good, wise, and moral decisions I'm sure our legislatures can find ways to save and be fiscally responsible in all their decisions. If there are laws that make some decisions impossible to make and are no longer viable laws, they should be eliminated or up dated to keep change moving in the right direction. Most people don't run their households so irresponsibly as our State government has done for too many years. Thank you for your service to CT. and please give this some serious thought.

Sincerely,

Kathy Taylor
